

HANVHA

Shock Absorbing Material

Manufactured from shock absorbing, chemical resistant, Elastomer, our Protection Cover guards the teach pendant from extreme manufacturing conditions and accidental falls.

Active Protection

Protection Cover protects the exposed components most often damaged when the pendant hits the ground.

Unique Design

Protection Cover are made to increase the safety of the teach pendant without drastically modify their shape and functionality.

We Care We Cover

Based on long time experience on robot programming we understood how important is to keep safe a tool like a teach pendant, during the production time and, the most important part, during the commissioning.
