

# TBox

## for UR 3-5 Cobots

modular flightcase for transport  
of collaborative robots

Strong, against possible Accidents, Delicate with your Cobot. Our TBox is the right place to store your Cobot, to use it for your demonstrations and to move it between different working zones. It is compact, easy, resistant and can contain more than just a Cobot, your complete Co-world.

TBox is composed of 3 units:

1. Wheels
2. Box1 (below) for Control cabinet
3. Box2 (above) for cobot's arm + storage for stability legs.

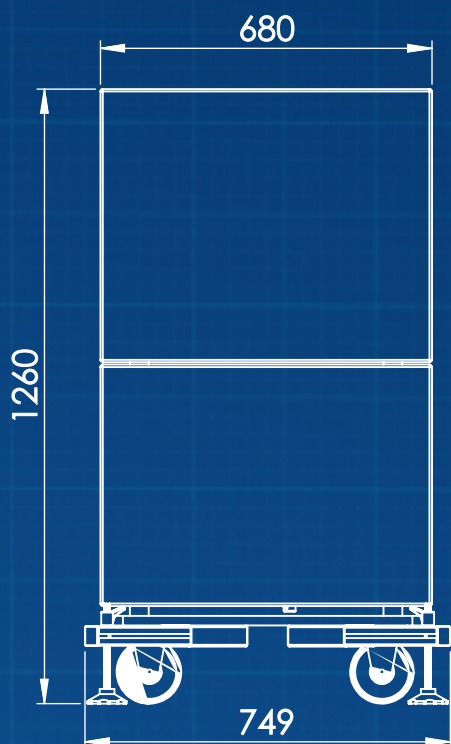

To load TBox inside a car, van, it is possible to separate units. For demonstrations it is enough to remove Box2, it can be used as table for applications, and to mount stability legs to help perform vision applications or mechanical applications.

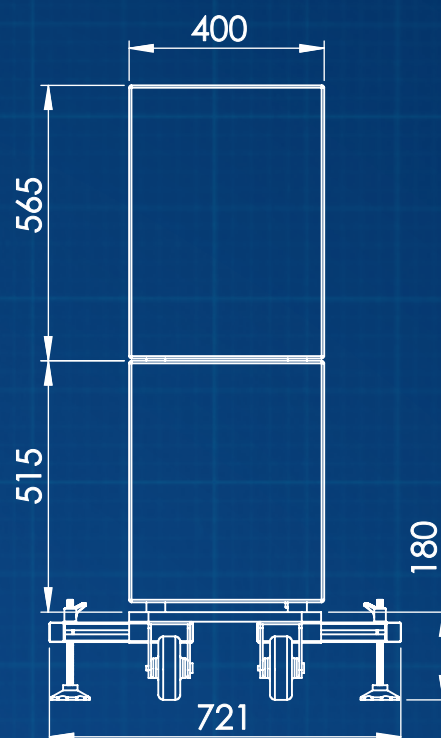

# Transport BOX

dimensions  
Units: mm

## SIDE

## FRONT

### Technical data:

Weight without / with robot:  
Robot\_Box - 20 kg / 39 kg  
Control\_Box - 14 kg / 30 kg  
Truck - 9kg

### Material:

Aluminum  
Birch plywood  
Black PVC foil  
Backpressure foil

### Compatibility:

UR3 – CB3/e-Series  
UR5 – CB5/e-Series

### Dimensions:

Height: 1260 mm  
Length: 680 / 749 mm  
Width: 400 / 721 mm
