

Cabinet Cover

for Universal Robots

From our experience for the protection of robot programming terminals, touch monitors, and above all from our installation, robot programming and production assistance in various production areas, the product for the Universal Robots control cabinet projection is born. Made of fireproof, tear-resistant material, it protects the cabinet from dust and liquids. The materials are certified and the product also covers the teach pendant, already protected by our Protective Cover from accidental falls. The cabinet cover is the ideal product for small and medium-sized enterprises that need to protect their investments, in the same way for companies in the automotive sector.
