Modular Shelf

System for MIR100/200 3SH Fixed

We are proud to introduce a new range of products for AGV and Mobile Robots.

Our solutions, sold with the formula "order and assemble by yourself", are supplied with everything necessary, assembly drawing and screws, to simplify and speed up the supply of modular shelving systems for different applications. We can provide customization of products with our Partners' logos. We have many designs in our catalog but we are always available to produce customized solutions.

Fastening the rack to MiR 100 trolley takes place by M8 bolts, which guarantee proper stability and reliability of fastening.
